

# **Round inserts, Form 0**

### Item description/product images

# Description

### Material, version:

Stainless steel with diamond impregnated surface comparable with 100-grade abrasive grit.

## Note:

Grippers and inserts are ideal for use in clamping arms, gripping systems, clamping fixtures, clamping jaws and self-aligning pads. The use of grippers allows the transfer of very high torque values and above average grip, even with hard materials and surface irregularities.

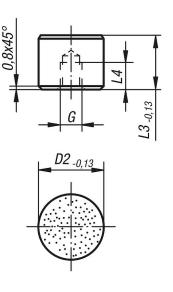

Form 0: The abrasive diamond surface is bonded firmly to the base. It is ideally suited to supporting smooth or slippery applications with a minimum of clamping pressure. This allows the diamond particles to get a firm grip on a very small area with minimum damage to the surface.

The diamond surface offers excellent wear resistance.

Grippers and inserts can be fitted in the following self-aligning pads: Order No. B0150.117X022 up to B0150.936X036 Order No. B0154.110X015 up to B0154.924X100 Order No. B0156.120X030 up to B0156.924X080
