

Levelling sets

Item description/product images

Description

Material:

Steel 1.7225.

Version:

Electro zinc-plated and passivated.

Note:

Levelling sets are used wherever heavy systems, machines or equipment need to be placed and levelled. They are characterised by a wide adjustment range of 15 mm to 40 mm.

The static load F applies after deduction of the force applied by the fastening screw.

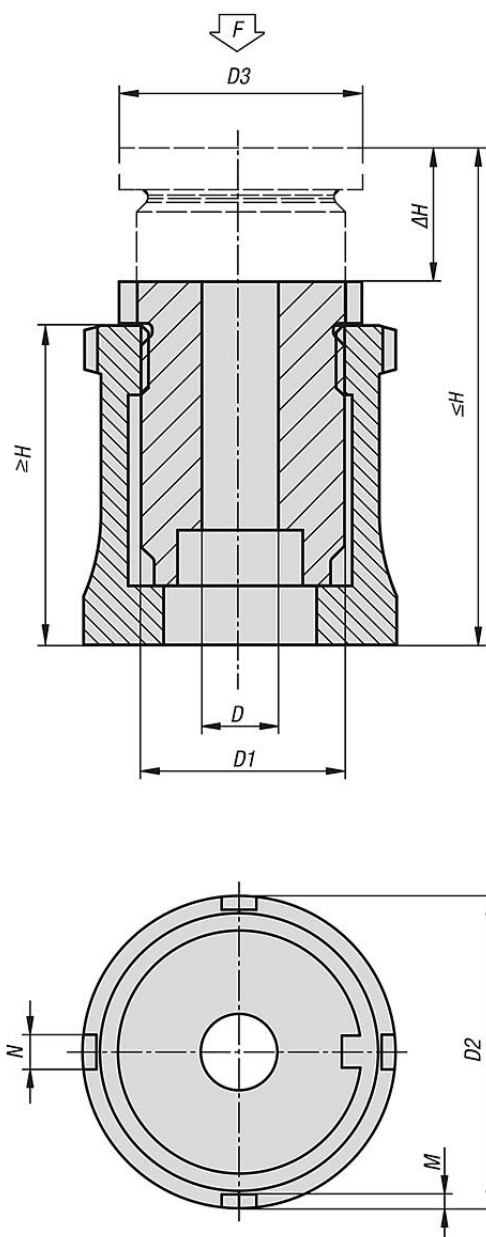

On request:

Other sizes.

Stainless steel A1 or A4 levelling sets.
